

schoolhouse **talk**

Schoolhouse Talk is a new Internet radio show that connects and engages people of all walks of life who care about public education. It's simple and easy to use. All that's required is a computer and an ordinary phone line. This first-of-its-kind radio program will bring together people on the front lines of education – classroom leaders, policymakers, advocates, parents, students and communities – to discuss the most important public education issues of our time.

Schoolhouse Talk informs listeners about what's happening in public education in Washington, DC and around the country; allows listeners to share information about schools in their own communities; and provides new on-line tools to share education reports, publications and resources. Some of our first guests will include Linda Darling-Hammond, one of President Obama's top education advisors on his campaign; and Dana Goldstein, the *American Prospect's* education editor.

The free hour-long radio show features:

-  live interviews with key education policy makers
-  a news round-up summarizing weekly education events
-  stories about new and innovative approaches to public education
-  call-in opportunities for anyone who wants their voice to be heard on education issues.

Schoolhouse Talk will use its interactive website (www.SchoolhouseTalk.org) to expand its reach into communities through on-line social networking, news feeds, show streaming and podcasts. The website will be live on May 5th.

HOW DO I PARTICIPATE? To tune in live to the weekly show, visit www.SchoolhouseTalk.org and click on the "Listen Live" button. You can also download a show from the website or through iTunes anytime after the show airs live.

The show takes live calls from its listeners. To ask a question, simply tune into the live show and wait until the host opens up the phone lines for questions. Then call **(347) 884-8557** to share your opinions or ask a question live.
